

The Possibility

A strange idea this is we think of now,
World peace, we ask this can be achieved how?

The answer's not clear, we do not know yet
It can be attained, I'm sure so don't fret.

Inspire hope and unity, yes do,
Give people something to look forward to.
Bring them all together in the same boat,
Bring in ev'rything, even ev'ry goat.

If we get all people to work
To a common goal but not smirk,
You will be surprised to find out,
Anything can be done, no doubt.

Human rights are keys that lead to world peace,
If all get equal treatment now at leas',
Then there is no reason to fight at all,
No citizen of the world will go brawl.

Race and religious belief vary from
Person to person, we need to become
Not just tolerant of all other men,
But accept those who are not like us then.

By bringing ev'ryone into
One large family we can do
Work to get closer to world peace
With no reason, fighting will cease.

Nuclear weapons must be stopped right now,
Fearing large detonations is not how
We should have to live in these times, today,
Now's the time to go out and find a way.

We will need a healthy environment,
Possibly with help from the government,
To nurture an era of amity,
So there won't be one of calamity.

This healthy environment can
Really speed up the work that man
And woman are trying to do,
With no distractions to slow you.

You say how do we achieve this great feat
The answer is not simple, or complete,
And it will take many steps to do so
Support is vital, or the plan won't flow.

Convince leaders across the world to give
All people basic rights, including live.
Teach the whole world's population about
How we're more alike than dif'rent, no doubt.

If I were president I'd go
Implement above measures, so
We can be a few steps nearer
A world that's a little clearer.
