Brian O'Leary: *The Energy Solution Revolution*

**Tuesday, April 27, 6:00 PM Potluck,
7:00 PM Talk**

**Mt. Diablo Peace & Justice Center
55 Eckley Lane, Walnut Creek, CA 94596**

Potluck dinner and presentation by a former US astronaut and physics professor who studies and promotes new renewable and abundant energy sources that clean our environment while removing fossil fuels as one of the principal reasons for wars.

Brian O'Leary, Ph.D. is a scientist-philosopher with fifty years of experience in academic research, teaching and government service in frontier science and energy policy. He was a NASA scientist-astronaut during the Apollo program, the first to be selected for a planned Mars mission, and he participated in unmanned planetary missions as an Ivy League professor.

Over the past four decades, Dr. O'Leary has been an international author, speaker, peace activist, founder of non-profits, and adviser to progressive U.S. Congress members and presidential candidates. His latest book, *The Energy Solution Revolution*, describes the enormous potential of breakthrough clean energy technologies, their suppression and their logical necessity for our survival.

Dr. O'Leary was recently appointed director of Ecuador affairs for the Intergovernmental Renewable Energy Organization, affiliated with the United Nations. He is now "retired" in Vilcabamba, Ecuador, constructing and opening a new eco-retreat center for peace, sustainability, the arts and new science.

Cost: \$20 (or 20 Thank yous) and a dish to share. RSVP online at <http://www.friendlyfavors.org>. (Co-sponsored by Friendly Favors, a Web-based community online since 1999)

"You never change things by fighting the existing reality. To change something, build a new model that makes the existing model obsolete." - R. Buckminster Fuller
